

To whom it concerns,
I am sending you this note to encourage you to reject NAB's petition 04-160. I am an XM radio subscriber and a truck driver. There is a neccessity for this service! I drive mainly in the intermountain west where radio stations are few and far in between. The weather info has helped me many times. Please don't let those who refuse to improve their service and be more competitive take away the choice we have to PAY for a service we deem necessary. Let free enterprise rule the market, not lobbyists!

Thank you for your attention to this matter.

Todd W. Wayment
